

Nikhil Uke

E-Commerce Engineering Leader | Frontend Architecture Specialist | AI-Driven Application Developer

Strategic Engineering Leader with 10+ years of experience targeting senior roles in Frontend Architecture and E-Commerce Platform Engineering across high-growth product organizations and global teams, delivering scalable system design, AI-driven innovation, and high-performance, user-centric digital experiences; open to opportunities in Indore, Nagpur and remote.

Profile Summary

- ❖ Currently leading the design and delivery of **scalable, high-performance digital platforms** across E-Commerce and enterprise domains, driving frontend architecture decisions and ensuring robust, future-ready engineering solutions.
- ❖ Extensive expertise in **Frontend Architecture and modern JavaScript ecosystems**, enabling large-scale application modernization using React.js, Next.js, Node.js, and composable commerce frameworks.
- ❖ Proven track record in **engineering and optimizing enterprise e-commerce platforms**, significantly enhancing user experience, performance, accessibility, and SEO outcomes.
- ❖ Demonstrated leadership in **mentoring and guiding engineering teams**, establishing code quality benchmarks, and driving best-in-class development practices across projects.
- ❖ Strong capability in **integrating Generative AI and advanced prompt engineering**, delivering intelligent, conversational, and highly personalized application experiences.
- ❖ Adept at **translating complex business requirements into scalable technical solutions**, aligning product vision with architecture and execution in fast-paced, agile environments.
- ❖ Recognized for driving **continuous improvement, performance optimization, and innovation**, leveraging reusable architectures and modern engineering practices to deliver measurable business impact.

Core Competencies

Frontend Architecture & Scalable System Design	Performance Optimization & Web Application Tuning	Agile Delivery Leadership & Engineering Execution
E-Commerce Platform Engineering & Digital Commerce Strategy	User Experience Engineering & Accessibility Compliance	Technical Solutioning & Architecture Governance
Application Modernization & Legacy Transformation	AI Integration & Intelligent Application Development	Stakeholder Management & Cross-Functional Collaboration

Technical Skills

- ❖ **Languages & Frameworks:** JavaScript, TypeScript, React.js, Next.js, Node.js, Redux, Redux Saga, React Query, React Native, Electron.js, HTML5, CSS3, SCSS, SQL, SFCC Composable Storefront (PWA Kit)
- ❖ **Tools & Platforms:** Git, Bitbucket, GitHub, Jira, Confluence, Postman, Kibana, Amplience, Salesforce Commerce Cloud (SFCC), Algolia, ForgeRock, Azure, Jenkins, SonarQube, VSTS
- ❖ **Development Environment:** Visual Studio Code, Cursor, WebStorm, Visual Studio, SQL Server Management Studio
- ❖ **AI & Emerging Technologies:** Generative AI, Prompt Engineering
- ❖ **Domain Expertise:** E-Commerce, Telecommunications, Insurance, Public Safety

Education

Bachelor of Engineering | IET DAVV, Indore, Madhya Pradesh

Career Timeline

Publicis Sapient | Senior Software Engineer | Sep 2021 – Present

BrandSafway – Fieldtrax (2026 – Present)

- ❖ Owning end-to-end engineering of a **global workforce and operations platform**, driving frontend architecture and scalable system design across distributed environments.
- ❖ Leading a cross-functional team, establishing **engineering standards, code quality frameworks, and delivery governance**.
- ❖ Driving improvements in **application performance, accessibility compliance, and enterprise usability**.
- ❖ Partnering with stakeholders to align **platform capabilities with operational efficiency and business outcomes**.

Carter’s E-Commerce Platform (2024 – 2025)

- ❖ Spearheaded **regional pricing architecture and experimentation strategy**, enabling data-driven commercial decisions across markets.
- ❖ Architected and integrated **AI-powered product discovery (Algolia) with SFCC PWA Kit**, significantly enhancing search relevance and conversion journeys.
- ❖ Designed scalable **CMS-driven content architecture using Amplience**, accelerating go-to-market speed.
- ❖ Delivered measurable improvements in **SEO performance, page load efficiency, and user engagement**.

Verizon ACSS Telecom Platform Modernization (2022 – 2024)

- ❖ Led large-scale modernization from **ExtJS to React-based architecture**, transforming platform scalability, maintainability, and performance.
- ❖ Defined and implemented **component-driven architecture and reusable design systems**.
- ❖ Directed engineering teams, driving **technical decision-making, code governance, and delivery excellence**.
- ❖ Elevated platform standards across **performance optimization, accessibility, and SEO compliance**.

Ariat E-Commerce Platform (2021 – 2022)

- ❖ Engineered a **high-traffic digital commerce platform**, ensuring scalability and resilience during peak demand cycles.
- ❖ Integrated **AI-driven search and composable commerce (SFCC PWA Kit)** to enhance discovery and customer experience.
- ❖ Established **frontend best practices and modular architecture**, improving development velocity and maintainability.
- ❖ Optimized platform performance to support **high-volume transaction scenarios**.

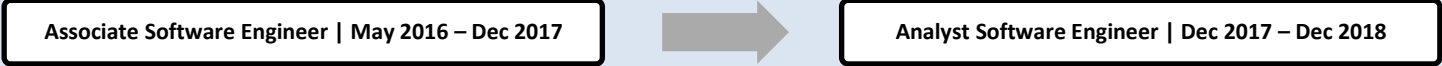

Capita India Pvt. Ltd. | Software Engineer | Jan 2019 – Sep 2021

Control Works – Public Safety Platform

- ❖ Led transformation of a legacy desktop solution into a **real-time, web-based operational intelligence platform**.
- ❖ Architected **scalable state management and data flow systems using Redux and Saga** for complex, event-driven workflows.
- ❖ Enabled faster and more accurate **decision-making for emergency response operations** through performance and usability enhancements.
- ❖ Contributed to platform stability and quality through **code governance and engineering best practices**.

Accenture Solutions Pvt. Ltd. | May 2016 – Dec 2018

Career Progression:

CIAM Platform (Hartford)

- ❖ Engineered enterprise-grade **identity and access management solutions** using Angular and ForgeRock.
- ❖ Designed and implemented **dynamic, configurable authentication frameworks** across multiple applications.
- ❖ Strengthened platform security through **advanced access control, device recognition, and session management**.

CXR Platform

- ❖ Developed scalable **authentication and user lifecycle management modules** for insurance systems.
- ❖ Improved platform performance and enforced **secure access control mechanisms**.

Large Property Underwriting Platform (2016 – 2017)

- ❖ Built web-based solution for **risk assessment and premium computation**, supporting large-scale underwriting operations.
- ❖ Enabled **data-driven decision-making through automated reporting and analytics workflows**.

 AI & Innovation Initiatives

- ❖ **Generative AI & LLM Solutions:** Designed and delivered AI-powered applications leveraging OpenAI, Claude, Gemini, and Llama models, applying advanced prompting techniques (Zero-shot, Few-shot, Role-based, Chain-of-Thought) to significantly enhance response accuracy, contextual understanding, and user experience.
- ❖ **AI-Powered Semantic Search Platform:** Architected a conversational search system using OpenAI APIs, enabling natural language queries and improving search relevance and discovery beyond traditional keyword-based approaches.
- ❖ **Virtual Try-On Experience:** Developed an interactive, real-time product visualization solution, enhancing customer engagement and digital experience in e-commerce environments.
- ❖ **Privacy-First Local LLM Chatbot:** Engineered a locally deployed chatbot using Llama (GGUF) with node-llama-cpp, integrating voice capabilities (TTS) to deliver secure, offline, and voice-enabled conversational experiences.

 Personal Details

Date of Birth: 31st October 1994

Languages Known: English & Hindi

Address: Indore, India
